Web	www.neos.hr
Foundation date	July 4 th , 2002

Business

We have intimate knowledge of business requirements of companies operating in financial and telecommunication industries, as well as public sector regarding tax and finance. Specifically, we cover:

- profitability analysis
- risk management
- tax and fiscalization (B2C and B2B)
- business performance management
- business process management
- case management
- fraud management

Technology

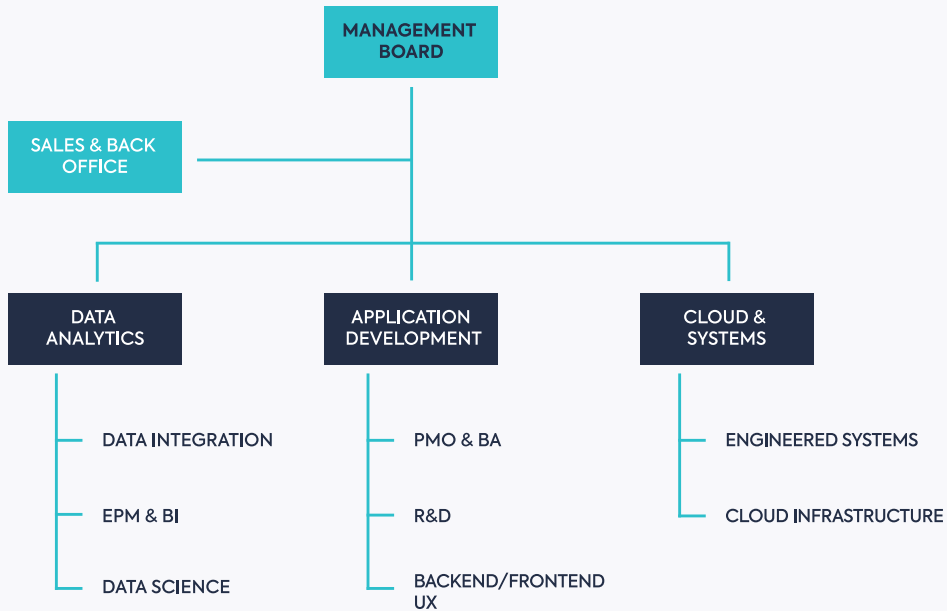

Technology is in direct relation to business. We are experts in supporting requirements of modern and agile business processes. We bridge technology and business in our line of business:

- **Advanced Analytics**
 - Business Intelligence
 - Predictive analytics and Machine learning
 - Data Integration and Data Warehousing
- **Application Development**
 - DevOps/SecOps
 - Project management
 - Enterprise solutions
- **Cloud and Systems**
 - Engineered systems
 - Multicloud solutions
 - Data management

Nearshoring

Neos employs highly skilled experts with formal certificates and, even more importantly, extensive experience in working on local, regional and international projects in large enterprises.

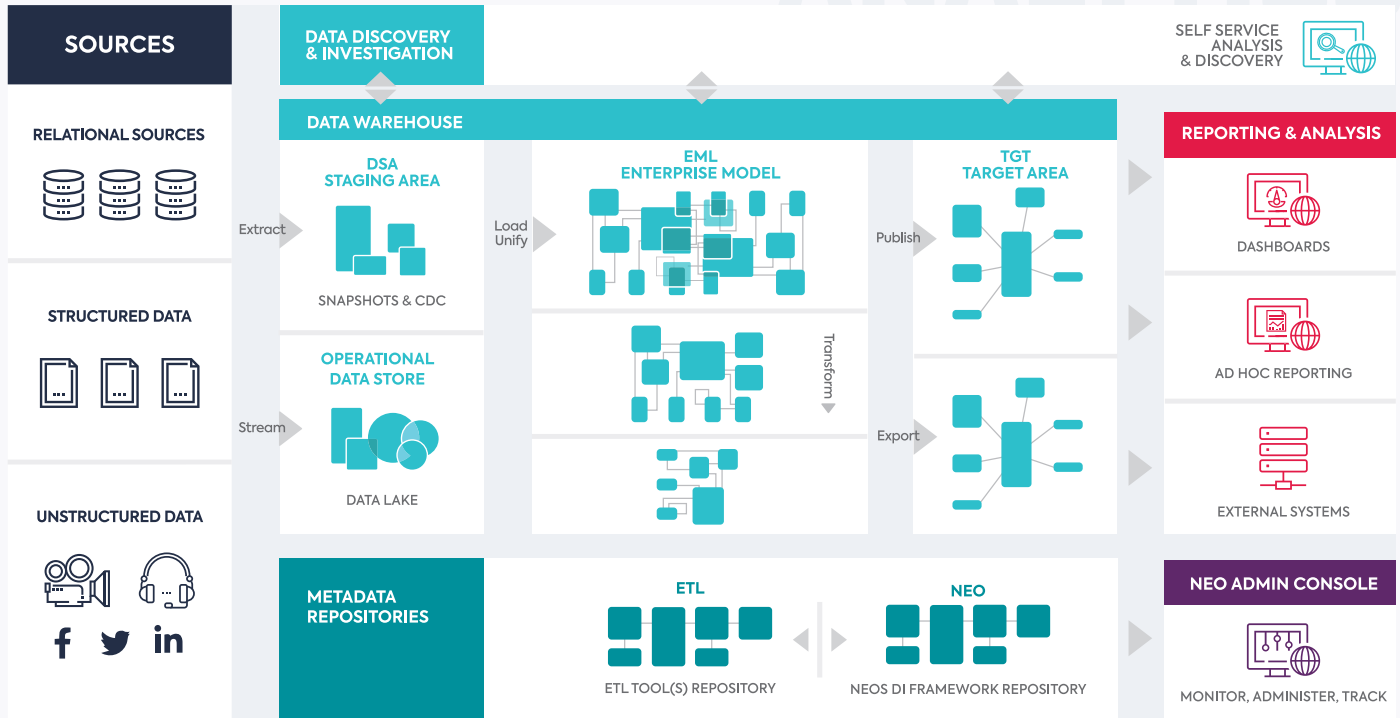

We have successfully carried out a multitude of complex projects for various clients and industries. Among them are some of the largest Croatian and European banks, telecommunication and other major international companies.

We transform data into business value.

DATA ANALYTICS

Referential Logical Architecture

Services

- Data Warehouse systems

- Complex, Enterprise-Level DWH systems design and development
- Data Integration implementation services
- Industry specific data models
- Data Governance, Data Quality
- Assessment/Health-check of existing DWH systems
- DI tool & repository migration services

- Advanced Analytics solutions

- Predictive systems based on machine learning (ML & AI)
- Graph based solutions – Social Network Analysis (SNA)
- Business solutions based on BigData technologies – Customer insight, Marketing, Risk, Fraud, etc.
- Integration to Enterprise IT landscape (security, separate environments, data integration, etc.)

- Business Intelligence solutions

- Enterprise reporting including predefined dashboards
- Self service data analysis
- Data visualization

- Oracle Financial Services Analytical Applications (OFSAA) implementation

- Profitability Management, Fund Transfer Pricing, Asset Liability Management, etc.

- Education

- Data Warehousing Concepts
- Oracle Data Integrator 12c for developers
- SQL and ETL optimization for DWH Developer

Products

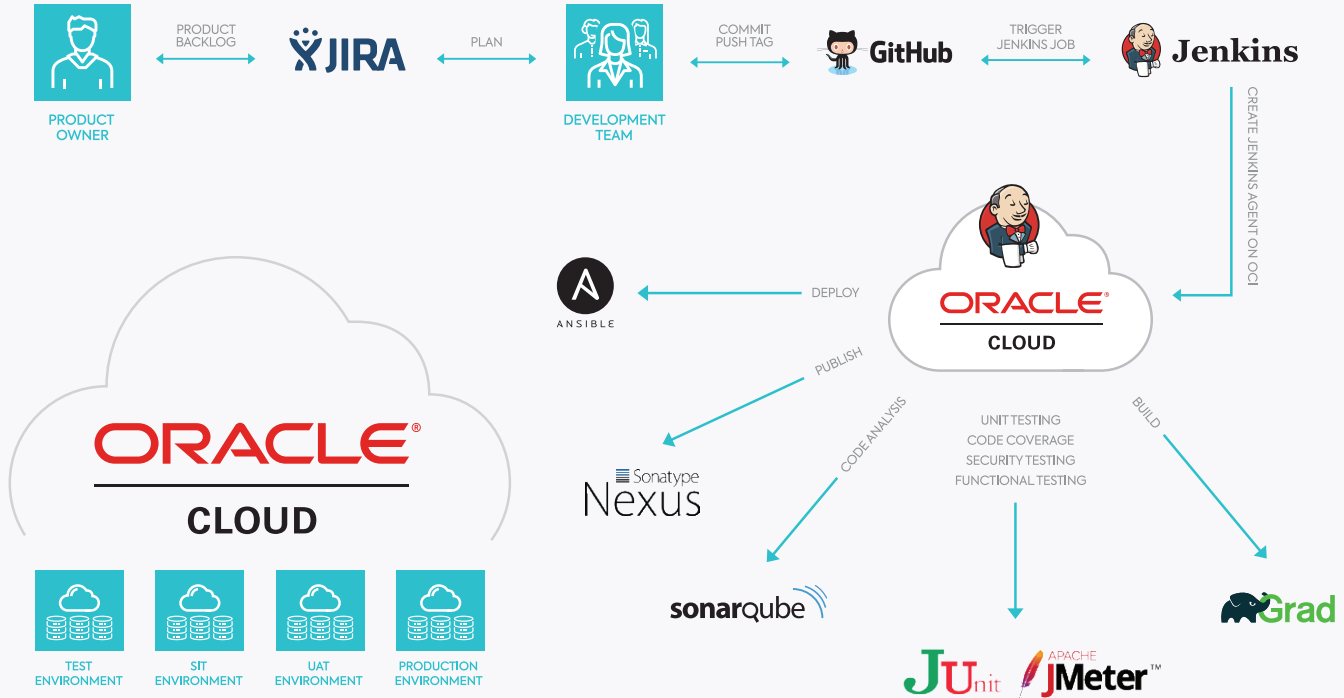

- Neos Data Integration (DI) Framework
- Neos Profitability Insight
- Financial Institutions Data model

APPLICATION DEVELOPMENT REFERENCES

Our expertise with multicloud, hybrid and on-premise platforms provides best business support for each specific client scenario.

Cloud solutions

- Oracle Cloud Infrastructure (OCI) and PaaS-based offerings
- Multicloud integration
 - Oracle Cloud, MS Azure/Office 365, Amazon AWS
- Hybrid Cloud infrastructure
 - Best of both worlds combined – on-premise and cloud
- Move & Improve existing workloads to cloud
- Support

Oracle Data Management

- DBA services
- High availability
- Disaster Recovery/Business Continuity

Oracle infrastructure installation, support and maintenance

- Oracle Field Delivery Partner (FDP)
 - Providing support for Oracle Engineered Systems and Appliances
- Oracle Hardware Installation Partner
 - Providing installation services for Oracle Engineered Systems and Appliances

System infrastructure design, delivery and deploy

- Networking and Communication infrastructure
- Security (on-premise, cloud and hybrid)
- Legacy systems optimization and consolidation

Oracle hardware expertise

- Oracle Engineered Systems
 - Oracle Exadata Database Machine
 - Oracle Private Cloud Appliance (PCA)
 - Oracle Big Data Appliance (BDA)
- Oracle Appliances
 - Oracle Database Appliance (ODA)
 - Oracle ZFS Storage Appliance (ZFS)
 - Oracle Zero Data Loss Recovery Appliance (ZDLRA)

	Oracle HW Exadata, Exdlitics, ODA, BDA, PCA, ZFS	Oracle Data Management (RDBMS,RAC,HA,DR)	Oracle MW & Virtualization (Weblogic, Oracle VM, Linux, OFM)	Big Data Platform (Cloudera, BDA, BD in Cloud)	Cloud Services OCI Multi-Cloud OCI + AWS, Azure
Financial Services
